MONDAY, JANUARY 25. 1742.

No. 2059.

arriv'd a Mail from Flanders, and Two Mails from France, with the Paris Letters of the 27th and 28th Instant, N. S.

the former there's a Letter from the Hague, dated the 16th, as follows:

**T**HEY write from Paris, That the Ministry of France seems to be under some Concern at the little Advantage which the Queen of Hungary's Forces have lately gain'd near Pilsack; and, according to some Letters too, they discover some Uneasiness for the Count de Segur, whom the Count de Khevenhuller has oblig'd to abandon the Post of Ebersberg, with no inconsiderable Loss on the Part of the French; after which the Count is said to have retir'd to Lintz, with M. Minusky, General of the Bavarian Troops, fully resolv'd to defend that Post with the Vigour possible. The Forces there amount to 10000 Men, and have Provisions for five or six Weeks; but 'tis much to be doubted whether the Count de Khevenhuller will be able to force them to surrender.

We hear that a Suspension of Arms for three Months has been concluded between the Austrians and Bavarians, and that in the mean time the Affairs of the Empire are to be regulated by Way of Accommodation, proposed by the Proposals under Consideration are agreeable to the Queen of Hungary.

This Queen, instead of reaping an Advantage from the Accommodation, will complete her own Ruin. If she had continued the War during the Winter with the Troops newly arriv'd from Italy, she would have considerably diminish'd the Army of the Allies, already reduced of all Necessaries, and not inur'd to the Severity of the Season; whereas by the Suspension, she gives them much Time to rest, and to provide themselves with every Thing necessary, to enable them next Spring to carry on their Conquests with Vigour.

The last Letters from Hanover say, that upon Advice that the Marshal de Maillebois intended to pass the Rhine next Spring, the necessary Preparations were making to put the Troops of that Electorate in a Condition to take the Field betimes, to oppose the Passage of the French, who are continually soliciting the Republic of Holland to remain Neuter. And they write from London, that the King is strenuously solicited by the Kings of France and Prussia to conclude a Peace with Spain.

The Paris Letter of the 31st N. S. which was last receiv'd, has a Letter from the Hague of the 20th, with the following Reflections of a certain Politician; who, that Writer need not have told us, was a Frenchman.

It seems as it were impossible to fathom the Depth of the Projects of our Court; while upon mature Reflection it appears that all Europe moves wholly by the Springs which our Ministry puts in Motion. When we trace Things to the Bottom, and trace them to their Origin, we can't help being surpris'd, if we consider the Extensiveness of the Views of France, and the Sublimity in which she engages all the Powers of Europe.

After the Death of the Emperor Charles VI. the King of France sent to the Queen of Hungary a Deduction of his Rights and Pretensions to the Netherlands; but the Queen of Hungary thinking herself well enough supported to defend them, despis'd the Proposals which were made to her by our Ministry, and the King upon this Refusal, not thinking it fit to maintain the Pragmatic Sanction, declar'd on a sudden for the Elector of Bavaria; in order to recover with the more Ease the Places that were yielded to him by the Treaty of Utrecht, in the Reign of Lewis XIV.

The Cardinal de Fleury, the Conductor of this Enterprise, perceiving that his Designs might possibly be counterbalanc'd by Russia, soon rais'd a War against it on the Part of Sweden, in order to put it out of the Power of that Court to divert his Projects.

But this Minister perceiving how ineffectual this might prove, and being moreover inform'd that the Princes of Brunswic were both willing and able to assist the Queen of Hungary, thought of a surer Method than to obviate every Obstacle, and having form'd a Design to be the Guardian of all the Princes of Europe, and to deal out to every Ward what Patrimony he pleas'd, he cast his Eyes upon Princess Elizabeth, as the lawful Heir of the late Czar Peter I. one that stood fair-

est to succeed him, and as one of those whom he the Cardinal thought worthy of his Protection. It did not cost above three Months time to accomplish this great Work, to re-establish the Princess in all her Rights, to raise a Rebellion, to dethrone a Czar, to expel the Germans out of that Empire, to get the Princess Elizabeth acknowledg'd Empress, to defeat the Projects form'd betwixt England and Russia, to engage the States of Holland to continue neuter, in a word, to tie the Hands of all that might be likely to oppose his Schemes: And who knows but after all these Operations, a Revolution more cruel than what has happen'd in Russia may be the Consequence in another Country, where the People are already but too much exasperated, &c. &c. But here the French Politician falls into a Dream, and therefore we drop him.

The Hague Letter in the Paris Almanac adds, that the Ministry of France design to make a Discovery of some new Projects next Spring, there being certain Advice that the Dragoons are order'd to be remounted and the Horse augmented, and that the Princes of that Court have order'd their Equipages to be ready by March next to go and serve in Bohemia, as 'tis giv'n out, but we design here to be upon our Guard.

By the Flanders Mail there's Advice from Passau of the 14th instant N. S. that the French there have taken the Keys from the Magistrates, and that upon Advice that the Austrians had gain'd several Advantages over the Allies, they have disarm'd the Burghers; and because the Bishop was unwilling to leave the Town when they desir'd him, they have disarm'd his Guards and plac'd a strong one of their own before his Lodgings.

Letters of the 9th from Rome say, that a very fine Vessel of Metal has been deposited among the Antiquities in the Capitol, which was made use of formerly to present the Tribute which Greece sent to the old Roman Consuls. 'Tis of very uncommon Workmanship, and was found in the Neighbourhood of Nettuno.

The Report in the Papers of the Dutch Governor of Baravia's having revolted from his Masters, meets with no Credit, because the Time was too short for any News to arrive of such Revolution, in consequence of the Advice sent to him by his Kindred of a Design to prosecute him for the Massacre of the Chinese.

P. S. Another Mail arriv'd last Night from Flanders with Advice from Francfort of the 14th Instant, that on the Day before the Electoral College chose CHARLES ALBERT CAJETAN, Elector of Bavaria, King of the Romans and Emperor of Germany, and that he was to be crown'd as last Tuesday by his Brother the Elector of Cologne, in whose Favour the Elector of Mentz, whose sole Right it is to crown the Emperor, was for this Time pleas'd to dispense with it. The Count de Pappenheim, Hereditary Marshal of the Empire, after having proclaim'd the Election, set out immediately with three Couriers to carry the News to his Majesty, who was then at Philip's Ruhe near Hanau, the Seat of the Landgrave of Hesse. The Conclave, which consisted of the two Electors of Mentz and Cologne, and the Electoral Ambassadors of all the three Ranks, lasted from nine in the Morning till two in the Afternoon.

Part II. The Origin of the Heaven of the Philosophers. In which all their General Systems of Nature are examin'd, and prov'd inconsistent and absurd.  
Part III. Experimental Demonstrations, that Light, Fire, Air, Water, Sand, Gold, and all Metallick and other Uncompounded Bodies, are so many Elementary Natures, neither capable of Destruction nor of Generation; and, no more than the Organized Species and the whole World, can have had any other Physical Cause than the Will of GOD.  
The Whole tending to prove, that what Experience teaches us, on these important Points, exactly corresponds with the Doctrines of Moses.
